

INTRODUCING TSAG's Newest Addition to FIRE SERVICES Dale Dueck!

TSAG's Fire Protection & Prevention program has been around since 2002 and since that time our program has continued to evolve and develop into a fantastic compliment to TSAG's existing training! To continue to supplement this program, TSAG is ecstatic to add another unique resource by bringing over Mr. Dale Dueck to the Fire Team!

Dale has been in the fire protection/prevention business for 32 years. In that time he's been primarily focused on fire inspections so he brings an abundance of qualified experience to our Fire Team and to the TSAG Fire Protection & Prevention Program! Dale can inspect any building size or classification set out by the Alberta Building Code (as per the Safety Codes Council). He can also investigate any size building including if there was any type of criminal activity or arson involved as well as if there was a death involved. A sprinkler fitter by trade with Red Seal Interprovincial certification allows Dale to inspect any type of fire suppression system in Canada and that provides him the ability to know what to look for! Over the years Dale's become very knowledgeable with Fire pumps and the infrastructure on fire systems. To round out Dale's compliment, he is a journeyman/Senior Fire alarm Technician that can test and certify Fire alarm systems.

With Dale's experience, background and training, we're confident he will bring a solid compliment to our Fire Team as well as provide confidence and peace of mind to all the First Nations we service with this program. Having already spent time with our Asset Condition Reporting System (ACRS) team, Dale is excited to move over into our Fire Program and be able to offer more of his expertise, ***"I'm going to enjoy working with the Tsag Fire team and I will do my best to instill confidence to the Nations that we're looking out for them and training them on maintenance items. Ultimately, we're here to work with the Nations to help reduce insurance costs as well as ensuring they are compliant with the current fire codes"***.

TSAG is now an accredited organization in Fire Discipline for Building and System Inspections (*Fire Alarm and Sprinkler*) and Fire Investigations; this means that Nations shouldn't have to hire external third-party agencies to investigate house fires throughout the year, we're just a call away! We are extremely excited to work with our First Nations and continue to develop our program to offer more services and better delivery of the program. The feedback we receive from our Nations is invaluable and we continue to see increasing numbers of participants attending our workshops and getting trained.

Should your nation wish to have TSAG come out to host a Fire Workshop or participate in Fire Prevention, please contact Cindy Conroy, Fire Protection & Prevention Manager, at 780-483-8601! Our dedicated team of trainers including Cindy, Michael, and Kaber would be happy to work with your Nation on your Fire Initiative!
